# PM1 GLASSWASHER ADVANTAGES

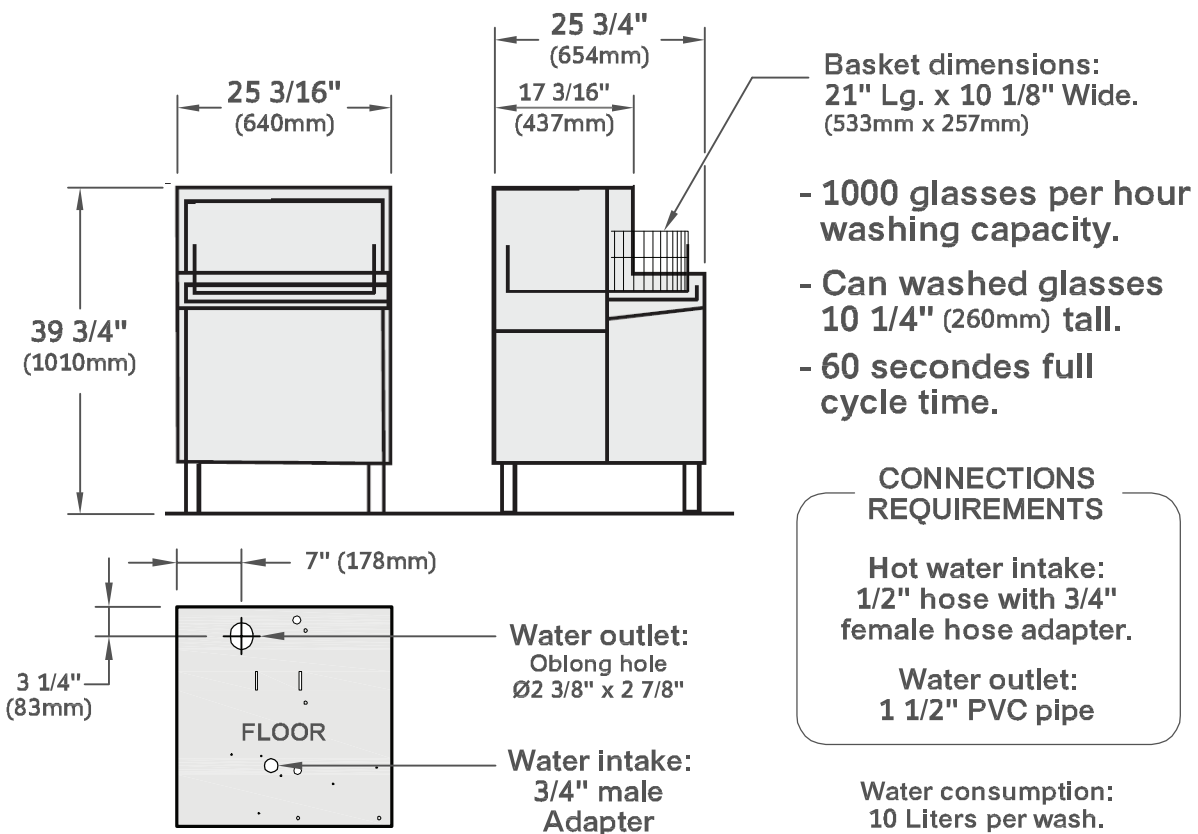

Built-in products storage space.

- Easy to use.
- Simple and sturdy construction.
- Made entirely of stainless steel.
- Virtually no maintenance required.
- Unique washing system with three rotary arms which provide a higher washing performance, delivering outstanding results.
- Hot water rinsing provides faster drying time.
- High grade stainless steel pump, provides constant pressure throughout washing cycle.
- 60 seconds full wash cycle.

## TECHNICAL SPECIFICATIONS

Power supply: 240 Volt 20 Amp.

# PM1 GLASSWASHER

## **- CONNECTION REQUIREMENTS -**

Hot water inlet = 1/2 " (Located in front center)

Waste water = 1 1/2 "PVC (Located at the back left)

Power supply: 240 Volt, 20 Amp.

## **- RECOMMENDATIONS -**

The installation of a 10 PSI pressure regulator is highly recommended to provide constant water pressure.

To improve stability, fasten the machine to the floor.

The hot water supply should never exceed 140°F (60°C)

For intensive use, copper plumbing drain is recommended.
